

CASE STUDY

SURENET ID

Instagram Carousel Series

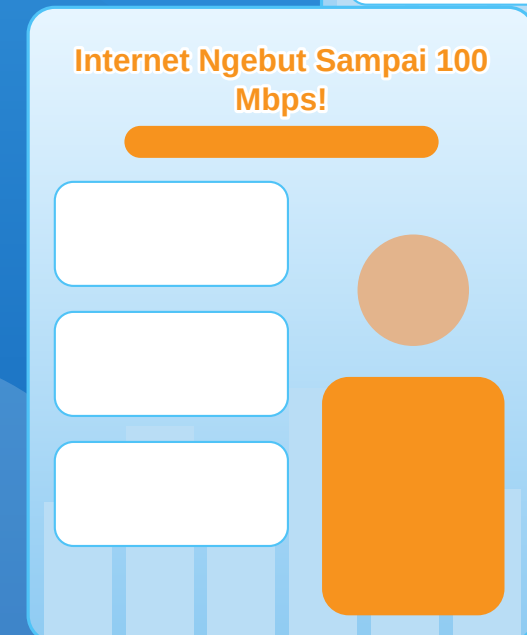

Turning home-internet specs into friendly, swipeable stories: a 12-slide feed and a 6-slide carousel set that make speed, price and support feel easy to understand.

Social media design

Carousel design

Brand visuals

Role: Social Media Designer | Language: Bahasa Indonesia | Platform: Instagram

Project at a glance

A full Instagram content set for a home-internet provider, designed to feel bright, local and approachable in a category that usually leans on technical jargon.

The project

SURENET ID needed social content that explains why fast, stable home internet matters in everyday life. I designed two carousel systems, a 12-slide feed and a 6-slide set, built around one shared visual language.

My role

End-to-end social design: content structure, slide layouts, visual system, component design, image direction and the Instagram presentation mockup.

The tone

Casual Indonesian copy such as "Gak Perlu Ragu" and "Ngebut" keeps the voice conversational and close to how the audience actually talks.

Quick facts

CLIENT	SURENET ID, home internet provider
DELIVERABLES	12-slide feed, 6-slide carousel set, phone mockup
FORMAT	Instagram feed carousels
LANGUAGE	Bahasa Indonesia, casual tone
PALETTE	Sky blue, brand blue, signal orange, white
CONTENT MIX	Benefits, coverage, pricing, trust, support
PRESENTATION	Instagram feed mockup on a phone frame

The challenge and the goals

Internet ads tend to be spec-heavy and forgettable. The brief was to make a utility feel human, local and easy to choose.

The challenge

Speeds, plans and prices are abstract. Followers scroll past dense promos, and most competitors look alike: cold blues, router photos and small print.

The content had to explain several things at once (coverage, packages, reliability, support) without feeling like a brochure.

The goals

1. Make people feel what fast internet changes in daily life.
2. Show clearly that service is available in their area.
3. Present package tiers and prices in a scannable way.
4. Build trust through local technicians and 24/7 support.
5. Keep every slide readable at phone size in a few seconds.

Who it speaks to

The content addresses households and families, remote workers, students and online gamers living in suburban and urban neighbourhoods.

They care about three things: will it stay stable, what will it cost, and who helps me when it breaks.

A content journey, slide by slide

Instead of one long sales pitch, the slides are grouped into four stages that mirror how someone decides on an internet provider.

One idea per slide. Every slide can stand alone in the feed, yet the swipe order tells a complete story from curiosity to sign-up.

Twelve slides, twelve jobs

Each slide in the 12-slide feed has a single purpose, a headline that promises a benefit and supporting copy limited to four short points.

01

Pasang Internet Sekarang Juga!

Opening hook: streaming, smart home, uploads, all in one connection.

02

5 Aktivitas yang Butuh Internet Cepat

Lifestyle use cases: streaming, gaming, meetings, uploads, smart home.

03

Koneksi Stabil Tanpa Drama

Reliability proof: stable under load, weather and peak hours.

04

Sudah Tersedia di Wilayahmu!

Coverage: location pins and a simple call to register.

05

Dekat & Cepat

Local technician team, on-site installation and repair.

06

Pilih Paket Sesuai Kebutuhanmu

Four package tiers with speed and monthly price.

07

Kenapa Harus Pilih SURENET ID?

Four reasons to choose: speed, service, price, local team.

08

Main Game Tanpa LAG? Bisa Banget!

Gaming segment with low-ping messaging and a gamer visual.

09

Bandingin Yuk! Cepat vs Lemot

Side-by-side comparison with green checks versus red crosses.

10

Internet Rumah, Gak Perlu Mahal

Affordability: flexible plans, steady performance.

11

Butuh Bantuan? CS 24/7 Siap Bantu!

Support: fast response, right solutions, friendly team.

12

Internet Ngebut Sampai 100 Mbps!

Speed promise and closing slide with the technician.

Visual language

Bright daylight, friendly rounded forms and one hot accent colour. The look signals speed and optimism rather than hardware.

Sky gradient
#9ED4F5 (approx.)
Backgrounds: daylight and openness

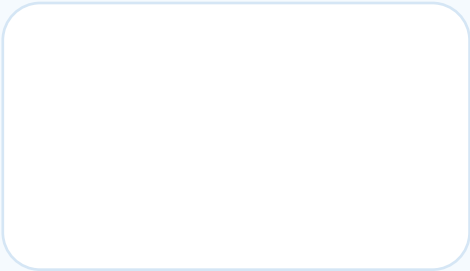

Brand blue
#1E88E5 (approx.)
Sub-headings, icons, card strokes

Deep navy
#0B3C73 (approx.)
Body copy and headline outlines

Signal orange
#F7931E (approx.)
Headlines, pills and calls to action

Cloud white
#FFFFFFF (approx.)
Content cards and text outlines

Success green
#2EAD5B (approx.)
Check marks and positive points

Typography

SERIES A: orange display headline, white outline

SERIES B: blue headline with orange highlight line

Heavy rounded display type for headlines, clean sans for body. The thick outline keeps headlines legible over busy photography.

Slide anatomy

Every slide uses the same six-layer structure, so the feed feels like one family even when the content changes.

- 1 **Headline**
Two lines max, heavy display type, orange fill with a white outline for contrast over any photo.
- 2 **Sub-headline pill**
An orange capsule that adds the promise or reassurance in one short line.
- 3 **Content cards**
White, rounded, cyan-stroked cards hold the information so text never fights the background.
- 4 **Icons and markers**
Check marks, pins and icons act as visual anchors and make points scannable.
- 5 **Human subject**
A smiling person grounds the benefit and gives each slide an emotional focus.
- 6 **Daylight backdrop**
Soft, blurred homes and city skylines under a bright sky keep the mood airy.

The component kit

A small set of reusable components carries the whole series. Each solves one communication problem.

Check-list card

Four short benefits with green ticks. Used for slides 01, 07 and 12 so that benefits can be absorbed at a glance.

Speech-bubble callouts

Rounded bubbles around a person turn activities and benefits into a conversation (slides 02, 08, 10).

Location pins

Red pins in white capsules make coverage feel concrete and local (slide 04).

Pricing tiers

Four mini cards pair a Premium label with Mbps and monthly price so plans compare quickly (slide 06).

Comparison split

Two cards, green ticks against red crosses, show the difference between fast and slow internet (slide 09).

Icon grid

A 2 x 2 grid of icon tiles for support options keeps service information light (slide 11).

Imagery and people

Real, smiling people in bright, natural scenes stand in for the product, since internet itself is invisible.

Everyday users

A young woman with a smartphone appears on coverage and pricing slides. Her expression says it works and it is easy.

The gamer

A headset-wearing player with a controller makes the low-lag promise instantly readable for a key segment.

The technician

A friendly worker in an orange uniform echoes the brand colour and puts a face on local, reliable support.

Work from home

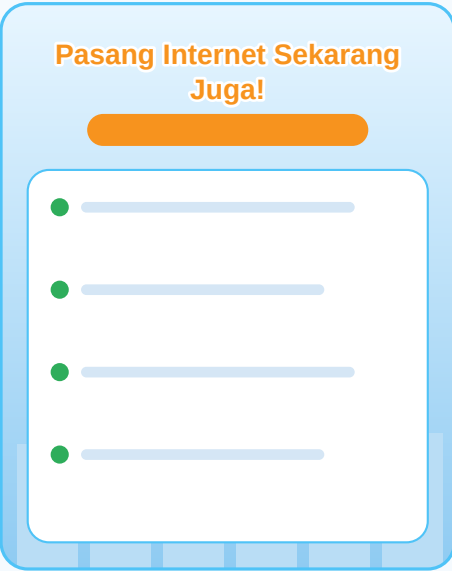

A laptop scene in a sunlit room anchors the productivity message in the second carousel set.

Image direction rules

Bright daylight and a soft blue sky in every scene. Shallow-focus home or cityscape backgrounds so the cards stay the hero. Orange appears in clothing and props to tie photography back to the brand.

Series A: the 12-slide feed

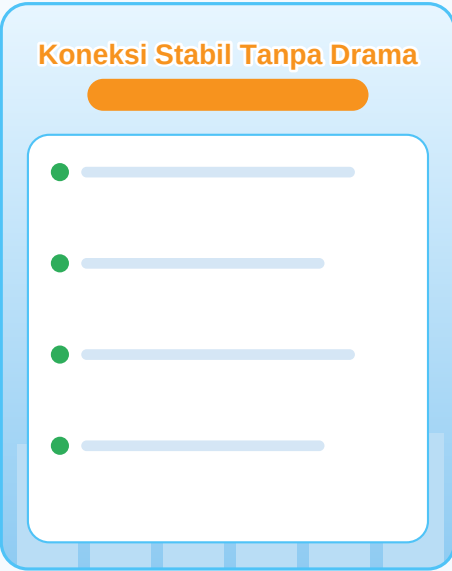

Layout map of the full feed, in swipe order. Replace each tile with the exported slide when presenting.

What changes in B

Blue headlines with an orange highlight line.

Cleaner white cards with icon-led bullets.

Soft wave footer and lighter photography.

A cover slide for the work-from-home audience.

Two systems, one brand

Both series share the same palette and components. They differ in density and emphasis so the feed does not feel repetitive.

	Series A (12 slides)	Series B (6 slides + cover)
Headline	Orange fill, white outline	Blue fill with orange highlight line
Cards	Rounded cards, speech bubbles	Clean white cards with icon bullets
Imagery	Full-bleed people and scenes	Lighter, airier photography
Density	Richer, more varied layouts	Simpler, more consistent layouts
Best for	Awareness and engagement	Conversion and clear information

Result: one flexible system that can lead with emotion (Series A) or clarity (Series B) depending on the campaign goal.

Key design decisions

The choices that shaped the final system, and the reasoning behind each.

Pill headlines over plain text

Pairing a bold outlined headline with an orange sub-headline pill creates a two-step read: a hook, then a promise.

One idea per slide

Short, scannable points (four maximum) respect the speed of scrolling and keep type large on mobile.

Semantic colour

Green means good, red means problem, orange means action. Meaning is learned once and reused.

Casual local voice

Everyday Indonesian phrasing makes the brand feel like a neighbour, not a telecom.

Faces over hardware

People and technicians replace routers as the hero, which builds trust and emotion.

Cards on busy photos

White cards with a soft cyan stroke keep text readable over any background.

Takeaways and next steps

What the project demonstrates, and how the system could be pushed further.

What I'd carry forward

A strong component kit lets you produce a large feed quickly while keeping it coherent.

Using the brand colour in the photography (the orange uniform) makes imagery feel designed, not stock.

Giving each slide one job makes carousels easier to write, design and measure.

Offering two visual variants gives the client flexibility between awareness and conversion goals.

What I'd test next

A/B test headline styles (orange A versus blue B) on reach, saves and shares.

Test opening-slide variants: lifestyle hook versus price hook.

Add a clear sign-up path on the final slide, such as a QR code or WhatsApp link.

Build motion versions of key slides for Reels and Stories.

Localise the coverage slide per area with real neighbourhood names.

Thank you
