CASE STUDY | SKINCARE SOCIAL DESI

Snow White Body Toner

Instagram Carousel Series

Calm, clean and confident visuals for a body care product.

ROLE
Social Media Designer

DELIVERABLE
12 slide post series

PLATFORM
Instagram feed

01 PROJECT OVERVIEW

Making body care feel as calm as the product itself

Snow White Body Toner is a body care product aimed at brighter, smoother and healthier looking skin. The brief was to build an Instagram carousel series that educates people about common body skin concerns, shows the product in everyday use and builds trust, while keeping the feed calm, premium and easy to read.

Client	Snow White Body Toner
Project	Instagram carousel series for product education, reassurance and awareness
Format	Portrait feed posts, designed to read clearly on a phone
Language	English headlines with Bahasa Indonesia for FAQs and product detail
Role	Concept, layout system, typography, retouching and final design

Skills used

Art direction	Building a fresh, natural look from deep green, water and soft skin tones.
Editorial typography	High contrast serif headlines with italic accents for a premium feel.
Photo composition	Cropping and framing close up beauty portraits so text and product stay clear.
Content design	Turning FAQs, reminders and a stat into simple, scannable cards.
Visual storytelling	Mixing macro water imagery with real skin close ups to show care and results.

Deliverables

- 12 carousel slides covering product intro, FAQ, a stat card, skin concerns and brand statements.
- A second six slide set showing how the same system flexes to new headlines.
- An Instagram feed mockup with caption and engagement, to show the post in context.
- A reusable template kit for future skincare campaigns.

02 THE CHALLENGE

Talk about skin honestly without feeling clinical

Body skin topics such as dark underarms, chicken skin and body acne are personal. Many beauty posts either feel overly clinical or lean on harsh before and after shock. The series needed to feel reassuring, modern and trustworthy while still being clear about what the product is for.

Key problems

- **Sensitive subject matter.** Skin concerns must be shown with care, not embarrassment.
- **Crowded category.** Most skincare feeds look the same: pink, glossy and loud.
- **Trust.** Buyers want proof, clear answers and a calm tone before they try a body product.
- **Readability.** Long skincare copy had to fit small cards without feeling heavy.

Goals

Differentiate	Own a deep green and water look that feels natural, not clinical.
Educate	Explain concerns and answers through FAQs and short reminders.
Reassure	Use warm portraits and gentle copy to normalise body skin care.
Convert	Keep the product visible and the benefit clear: brighter, smoother, healthier.

Audience

- Young women who want a simple body care routine for brighter, smoother skin.
- People dealing with rough texture, dullness or body breakouts who need clear answers.
- Skincare shoppers who compare brands and look for calm, credible content.

03 CONCEPT AND STRATEGY

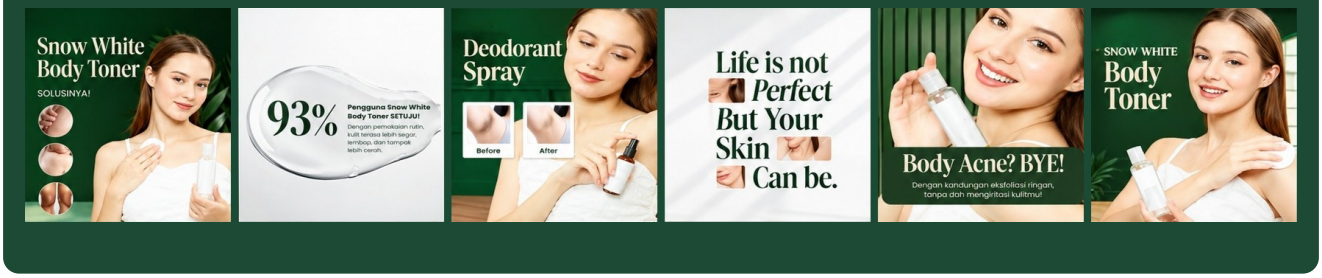

A feed that moves from care, to proof, to confidence

The carousel is planned as a gentle story. It starts by naming the product, answers common questions, offers a data point, and then ends on emotional brand statements.

Stage	Slides	Purpose
Introduce	"Snow White Body Toner Solusinya!" with three close ups of common concerns.	Name the product and the problems it addresses
Educate	"Pertanyaan Yang Sering Ditanyakan", Reminder cards and "Solusi Untuk Kamu Yang Chicken Skin!"	Answer doubts in plain language
Prove	A large 93% card, plus a Before and After comparison on the Deodorant Spray slide.	Give a clear proof point
Reassure	"Life is not Perfect But Your Skin Can be." and "Healthy Skin, Better."	Replace pressure with encouragement
Inspire	"When your skin glow, your confidence shows." and the "Body Acne? BYE!" card	Link skin health to confidence

Why this works

- Alternating photo slides and clean water slides gives the carousel rhythm: warm, then calm, then warm again.
- Short headlines carry the main message, and small cards carry the detail, so it reads in seconds.
- Real skin close ups are shown in small circles, which feels honest without overwhelming the viewer.

04 VISUAL IDENTITY

Deep green, clear water and warm skin

Forest Green
#1C4A34

Backgrounds, headlines, trust

Leaf Green
#3F7A57

Accents, lines, botanicals

Soft Peach
#F8E6D2

Info cards, warm skin tones

Water Mist
#E8EFF3

Clean backgrounds, product scenes

Typography

A refined, condensed serif carries all headlines. Key words switch to italic (Perfect, confidence) to add warmth and emphasis, and short accent lines sit under or beside titles as a quiet signature. Supporting copy uses a clean sans serif, kept small and dark for comfortable reading on light cards.

Design components

Botanical leaves	Green leaves frame corners and product shots, connecting the brand to natural care.
Water and ripple	Splashes, droplets and ripples show hydration and freshness on the light slides.
Soft cards	Rounded cream and white cards hold FAQs, reminders and stats in app style layouts.
Portrait cropping	Tight beauty crops with space for text, using the shoulder and hair line as natural margins.
Circle callouts	Round skin close ups on the intro slide keep concerns clear but discreet.

05 TEMPLATE SYSTEM

Six layouts keep a varied series cohesive

Template	Structure	Used on
A. Portrait and headline	Model on one side, serif title on the other over a green panel.	Intro, Deodorant Spray, Closing
B. Info card on water	Frosted card over a splash or product shot with a Q and A or reminder.	FAQ, Reminder
C. Hero statistic	Oversized number in a droplet shape with a short explanation.	93% slide
D. Typographic quote	Large serif statement on a light background with small image inserts.	Life is not Perfect, When your skin glow
E. Full bleed portrait	Cropped close up with minimal or no text for a calm pause.	Underarm portrait
F. Product and caption	Model holding the product with a dark label for the benefit line.	Body Acne? BYE!, Chicken Skin

Consistency rules

- The green and white palette never changes, so every slide is clearly one product family.
- Each slide has one main message, with a maximum of two lines of supporting copy.
- Headlines sit in clear space, away from faces and product labels.
- Photography keeps soft light and natural skin tones across all portraits.

06 SLIDE BREAKDOWN

What each slide does

Slide	Role in the story
01 Pertanyaan Yang Sering Ditanyakan	A peach FAQ card on a water splash. It answers whether the toner suits all skin types, including sensitive skin.
02 Snow White Body Toner Solusinya!	Opening product slide with three skin close ups in circles and a model applying toner with a cotton pad.
03 93% Pengguna Setuju	A big statistic in a water droplet, supported by a short note on smoother, fresher and brighter looking skin.
04 Deodorant Spray	A Before and After pair next to a model holding a spray bottle, for underarm care.
05 Reminder	A phone style notification card on a product scene, reminding users to prepare skin before applying.
06 Solusi Untuk Kamu Yang Chicken Skin!	A close crop of shoulder and product with a dark green label to name the concern.
07 Life is not Perfect	A typographic quote with small skin crops placed inside the sentence.
08 Underarm portrait	A quiet image slide, giving the carousel a visual pause.
09 When your skin glow, your confidence shows	A statement slide that connects skin health with confidence.
10 Body Acne? BYE!	A smiling model with the bottle and a short note about gentle exfoliation.
11 Healthy Skin, Better.	A clean droplet and ripple slide that works as a calm closing statement.
12 Snow White Body Toner	A closing product slide that returns to the opening green layout.

07 IN CONTEXT

How it looks in the feed

A phone mockup shows the first slide in the feed, with the caption "For brighter, smoother and healthier skin!". The deep green block stands out against the white Instagram interface, so the post is recognisable before the text is read. The six slide set beside it shows how the same system carries new headlines such as "Radiant & Even Skin" and "Smooth Brighter Healthier".

What to notice

- The serif headline stays legible at feed size, even over a busy leafy background.
- Skin close ups in circles take little space but communicate the concerns instantly.
- Green and white slides alternate, giving the profile grid a balanced look.

08 OUTCOME AND TAKEAWAYS

What the project shows

- **Calm sells care.** A restrained green and white palette made the product feel premium and trustworthy.
- **Editorial type builds credibility.** Serif headlines with italic accents lift a simple body care post.
- **Rhythm matters.** Alternating portraits, cards and clean water slides keeps a long carousel interesting.
- **A flexible system.** Six layouts produced both the 12 slide series and a second set quickly.

Project snapshot

Format	Instagram carousel series of 12 slides
System	Six layouts, also used for a second set
Visual style	Green and white palette with serif headlines
Designer's note	"Calm design helps a product feel trusted at first glance."

Design note by Tomisin, the designer of this project.

Tools

Design: Canva, Adobe Photoshop, Adobe Illustrator, Figma and Adobe Express.
Content: CapCut, Meta Business Suite, Pinterest, plus Freepik or Envato for stock assets.

Let's give your product a calmer, clearer feed.
Social media design, carousels and brand led content.
